DETAILED ACTION

Applicants' response, filed 28 July 2004 has been fully considered. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Claims 1-11, 13-17, 19-21, and 23-27 are currently pending. Claims 5-11, 13-17, 19, 20, and 25 are withdrawn, as stated in the previous Office Actions. Claims 1-4, 21, 23, 24, 26, and 27 are considered elected.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-4 and 26 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 1-4 and 26 recites "a diagnostic algorithm run entirely by a computer". Applicant has attempted to provide support for this amendment by pointing to page 2, line 15 to page 3, line 9 of the specification. However, this does not support a method which is entirely computer implemented. At best, the support provided is drawn to a method that selects a test based upon

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

No claims are allowed.

the results of a previous test, without operator intervention. There is nothing stating that the entirety of the method is computer implemented. The specification reads as follow:

“The present invention provides methods for algorithmic testing in the clinical laboratory whereby intelligent automation is introduced into an algorithm to allow the systems to **self-monitor after performing each assay** and determine the sequence and type of the next assay based upon the results just obtained. The method can select the **next appropriate test to be carried out and eliminates the unnecessary tests**. The system also allows movement between distinct modes of laboratory utilization without a prolonged transition period”.

Applicant is again invited to point to specific support by page and line number for the any amendments made to the claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 21 and 24 remain rejected under 35 U.S.C. 102(b) as being anticipated by Adalassnig et al. (Artificial Intelligence in Medicine (1995) Vol. 17, pages 1-24).

Applicant has not amended claims 21 and 24 to reflect that this system is computer implemented. Therefore, the rejections under Adalassnig et al. are maintained for the reasons set forth in the previous Office Action. Applicant is again reminded that any amendments to the claims must be specifically supported by pointing to page and line number in the specification.
